We listen to what you want

We take the time to understand you, your culture and your specific business requirements. We take a long-term partnership approach with all our clients, with the emphasis on communication, because we know that in the long run this proves to be most cost-effective for you.

We work out what you need

Because we've been around since 1970, we have years of industry experience that we put to good use when designing a solution for you. We don't believe in one-size-fits-all or off-the-shelf answers; we take every opportunity to find efficient and innovative ways of working.

And we make sure you get it

As a top tier intermediary, we carry influence with all the leading insurers. We can shape their offer to your requirements, starting with a blank page if necessary. At the same time, we are small enough to be agile and we're smarter and quicker than our competitors.

Don't take our word for it

“They've always got something going on – something that's different. They come up with new products and proposals. And they always look for different ways of tackling issues and handling things for us.”

TK Maxx

We are one of the UK's leading benefit and reward consultancies. We help your business perform better by helping you motivate, reward and retain your people.
